

Seed Propagation Tech

True South Seeds is seeking an experienced greenhouse grower to assist in with growing CBD hemp for seed in the Chattanooga, TN area.

Description

True South Seeds is a multi-faceted hemp operation focused on the production of high-quality CBD hemp flowers, seeds and seedlings. The Seed Propagation Tech is a full-time, salaried position. The position will involve working in an indoor environment, alongside the Propagation Manager and Propagation Lead, to produce feminized CBD hemp seed. The Seed Propagation Tech will be involved in nearly all aspects of hemp seed crop production.

Accountabilities

- Cutting and rooting clones for indoor seed crop
- Starting seeds for pollination of indoor seed crop
- Irrigation set-up, repair, maintenance and monitoring
- Nutrient management
- Integrated pest management and crop monitoring
- Pollination and feminization of seed crop

Required Skills

- 1+ year(s) of experience working in a greenhouse setting
- Experience and working knowledge of propagation methods (both sexual and asexual) is preferred
- Ability to lift 50-75# repeatedly
- Ability to follow directions and clearly communicate
- Ability to multi-task in a dynamic working environment
- Ability to work individually as well as with a team
- Ability to manage time efficiently

Qualifications

- Sober work life - alcohol and marijuana will be strictly prohibited on the farm
- Possesses a positive, yet realistic "I can" attitude
- Must be punctual, trustworthy and reliable
- Clean driving record

Compensation & Benefits

- \$40,000 annual salary
- Paid vacation time

To apply for this position, please send cover letter and resume to the attention of Meghan Cole Jones at truesouthseeds@gmail.com
